

Initial Meeting Notes

LIVERPOOL WEBSITE

Taylor and I talked about the direction for the project. She's going to start with the home page and make sure the color scheme and the simplicity is going correctly for the purpose of the site.

We went through images and established that this website is meant as a Segway for people who may have heard of Liverpool and want to know more information about them.

Taylor is going to make a few mockups and has my number for any questions and updates she has.
